

Portable Units

DYNAMIC DEGREENING

Designed to fit into existing airtight refrigeration chambers, creating the ideal degreening conditions.

Continuous temperature monitoring

Automatic real-time condition adjustment

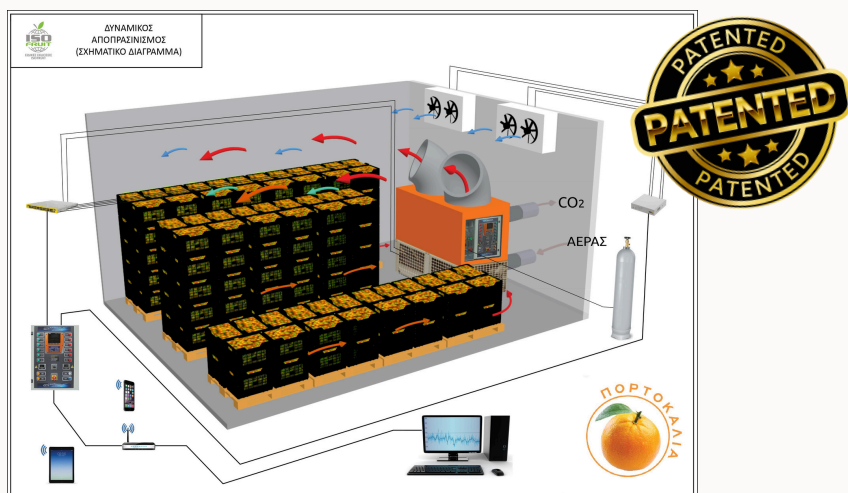

Dynamic adjustment of control systems

Portable Units

DYNAMIC DEGREENING

Enhanced Control

- Monitors and adjusts multiple parameters through high-precision sensors.
- Performs ethylene (C_2H_4) and carbon dioxide (CO_2) control for optimal performance.

Flexibility & Efficiency

- Portable design that fits easily into any refrigeration chamber.
- Reduces product movement, saving both time and cost.

Improved Product Preservation

- Regulates temperature and humidity for uniform results.
- Protects freshness and overall fruit quality.
